

# Innovative Technologies That Can Be Used on the Farm

Oleg Daugovish  
Farm Advisor,  
UCCE Ventura

Andre Biscaro , Farm Advisor UCCE-LA County

Session 2  
1:15 pm to 2:45 pm, Monday

# Goal of this presentation:

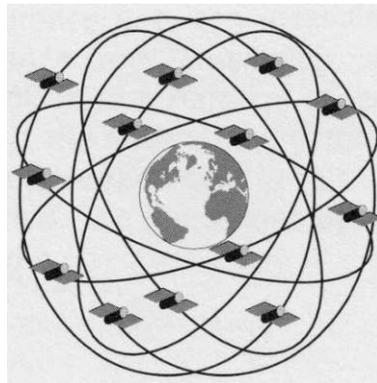

- Show examples of available technologies and ideas that can improve farm management

# Tools

- GIS – keep track of area, management, crop and soil properties
- GPS – direct soil samples and delineate different management
- Data Connectivity
- Free satellite imageries and low cost aerial/airplane imageries
- USDA Web Soil Survey
- Soil Electrical Conductivity sensors (Veris and EM 38) for rent
- Cell phone apps: soils to go and others

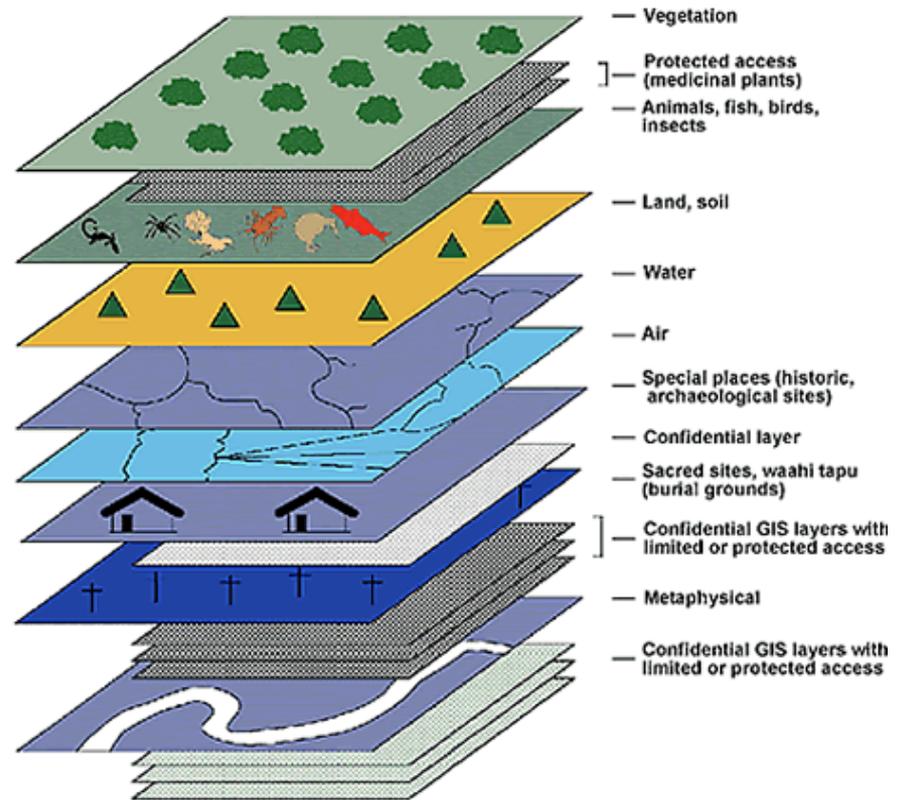

# GPS and GIS

- What's GPS?  
(Global Positioning System)  
Devices that give you positioning/latitude and longitude

# GPS and GIS (cont.)

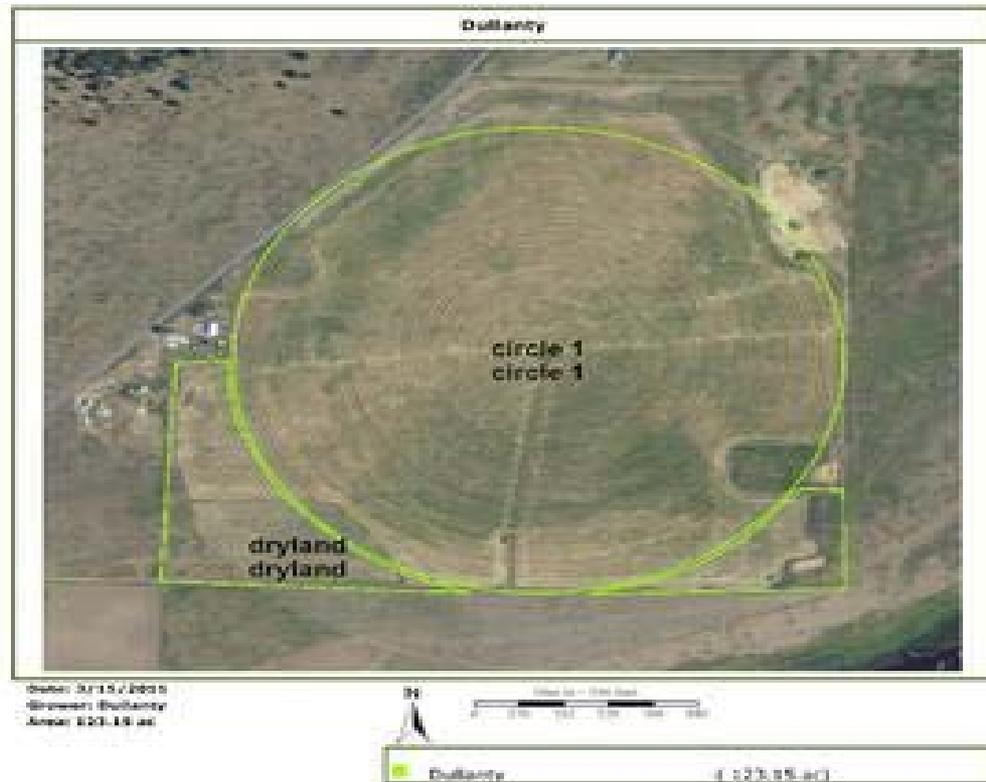

- What's GIS?  
(Geographic Information System)  
Software used to visualize and edit data with coordinates = maps

# GPS and GIS

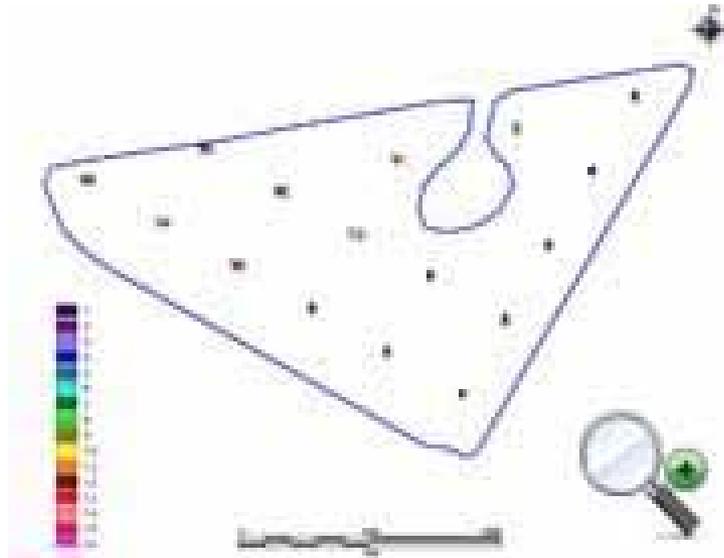

## Examples of uses

- Record boundary of your fields and obtain area (GPS)

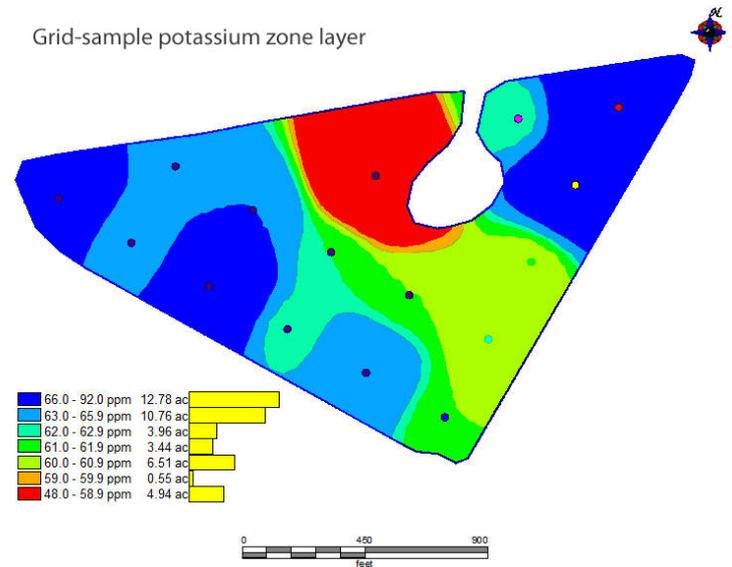

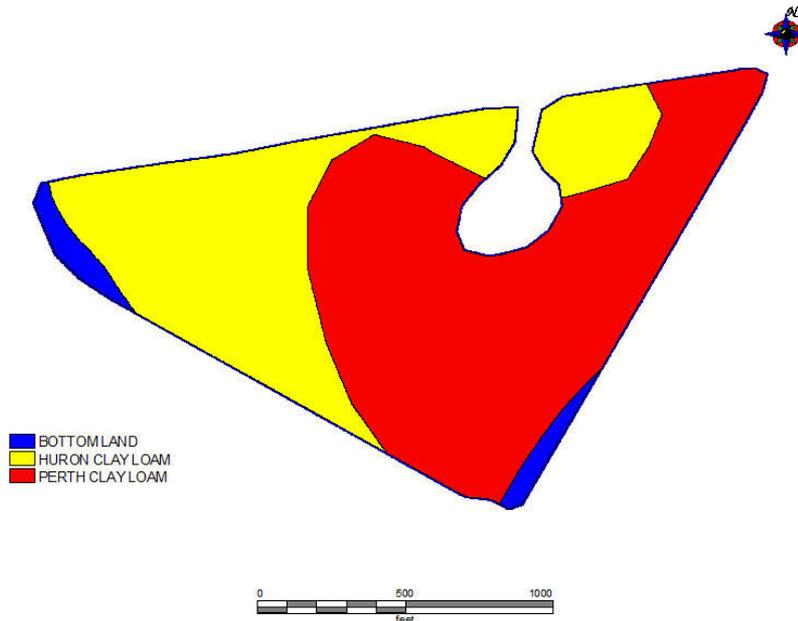

## Examples of uses (cont.)

- Record points where soil samples were taken or create points to guide soil sampling (soils are variable, even within a 15 acre field) (GPS)

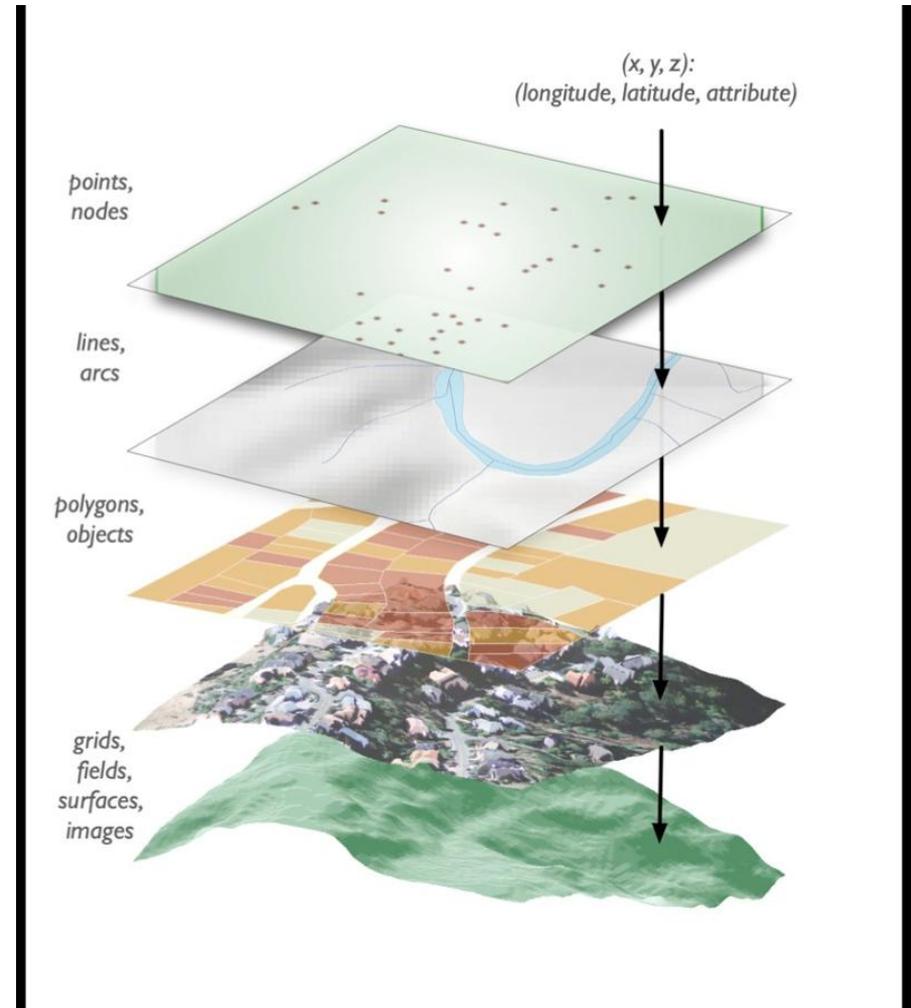

# Examples of uses (cont.)

- Create boundaries for areas with different management, soil type, varieties, diseases etc (GPS)

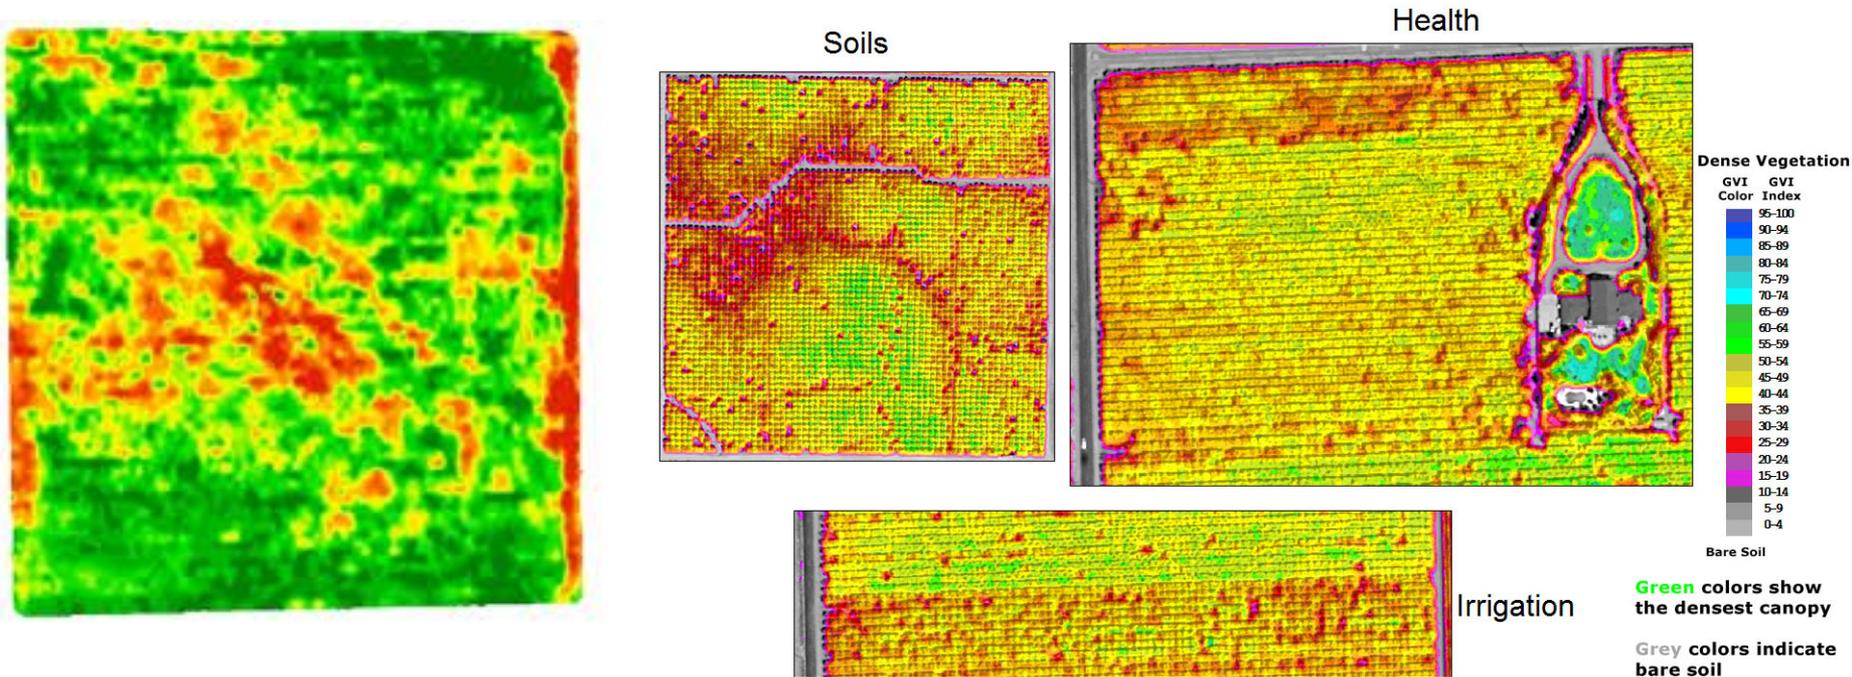

# Examples of uses (cont.)

- Great for record keeping (overlap maps from different years) – substitute of paper maps, you gain accuracy. Platforms for record keeping (GIS)

# Examples of uses (cont.)

- Visualize aerial/satellite imageries (GIS)

# Examples of uses (cont.)

- Corn maze (GPS and GIS)

- Free basic mapping software:
  - Google Earth
  - GE-Path
    - <http://www.sgrillo.net/googleearth/gepath.htm>
  - ArcGIS Explorer
  - Bing Maps
  - EasyGPS
    - <http://www.topografix.com>
  - BaseCamp & MapSource (Garmin)
  - VantagePoint (Magellan)
  - University of New Hampshire Cooperative Extension KML Tools Project
    - <http://extension.unh.edu/GISGPS/KMLtools.htm>
  - DNRGarmin
    - <http://www.dnr.state.mn.us/mis/gis/tools/arcview/extensions/DNRGarmin/DNRGarmin.html>
  - fGIS
    - <http://www.forestpal.com/fgis.html>
- Free GIS: QGIS and MapWindow GIS

### Overview

**ArcReader** is a free, easy-to-use desktop mapping application that allows users to view, explore, and print maps and globes. Anyone with ArcReader can view high-quality interactive maps authored by a high-level ArcGIS for Desktop product and published with the ArcGIS Publisher extension.

With ArcReader, you can

- **View, navigate, and print** published ArcGIS maps using ArcReader (.pmf files).
- Deploy your GIS data **to novices and professionals alike**.
- **Zoom, pan, and switch** between map and page layout views.
- **Communicate more efficiently** with the ability to graphically mark up maps.
- **Print published map and globe documents** including all layer symbology and cartographic map elements on any supported printer.

### Overview

**ArcGIS Explorer Desktop** is a free GIS viewer that gives you an easy way to explore, visualize, and share GIS information. ArcGIS Explorer adds value to any GIS because it helps you deliver your authoritative data to a broad audience.

With ArcGIS Explorer, you can

- Access ready-to-use ArcGIS Online basemaps and layers.
- Fuse your local data with map services to create custom maps.
- Add photos, reports, videos, and other information to your maps.
- Perform spatial analysis (e.g., visibility, modeling, proximity search).

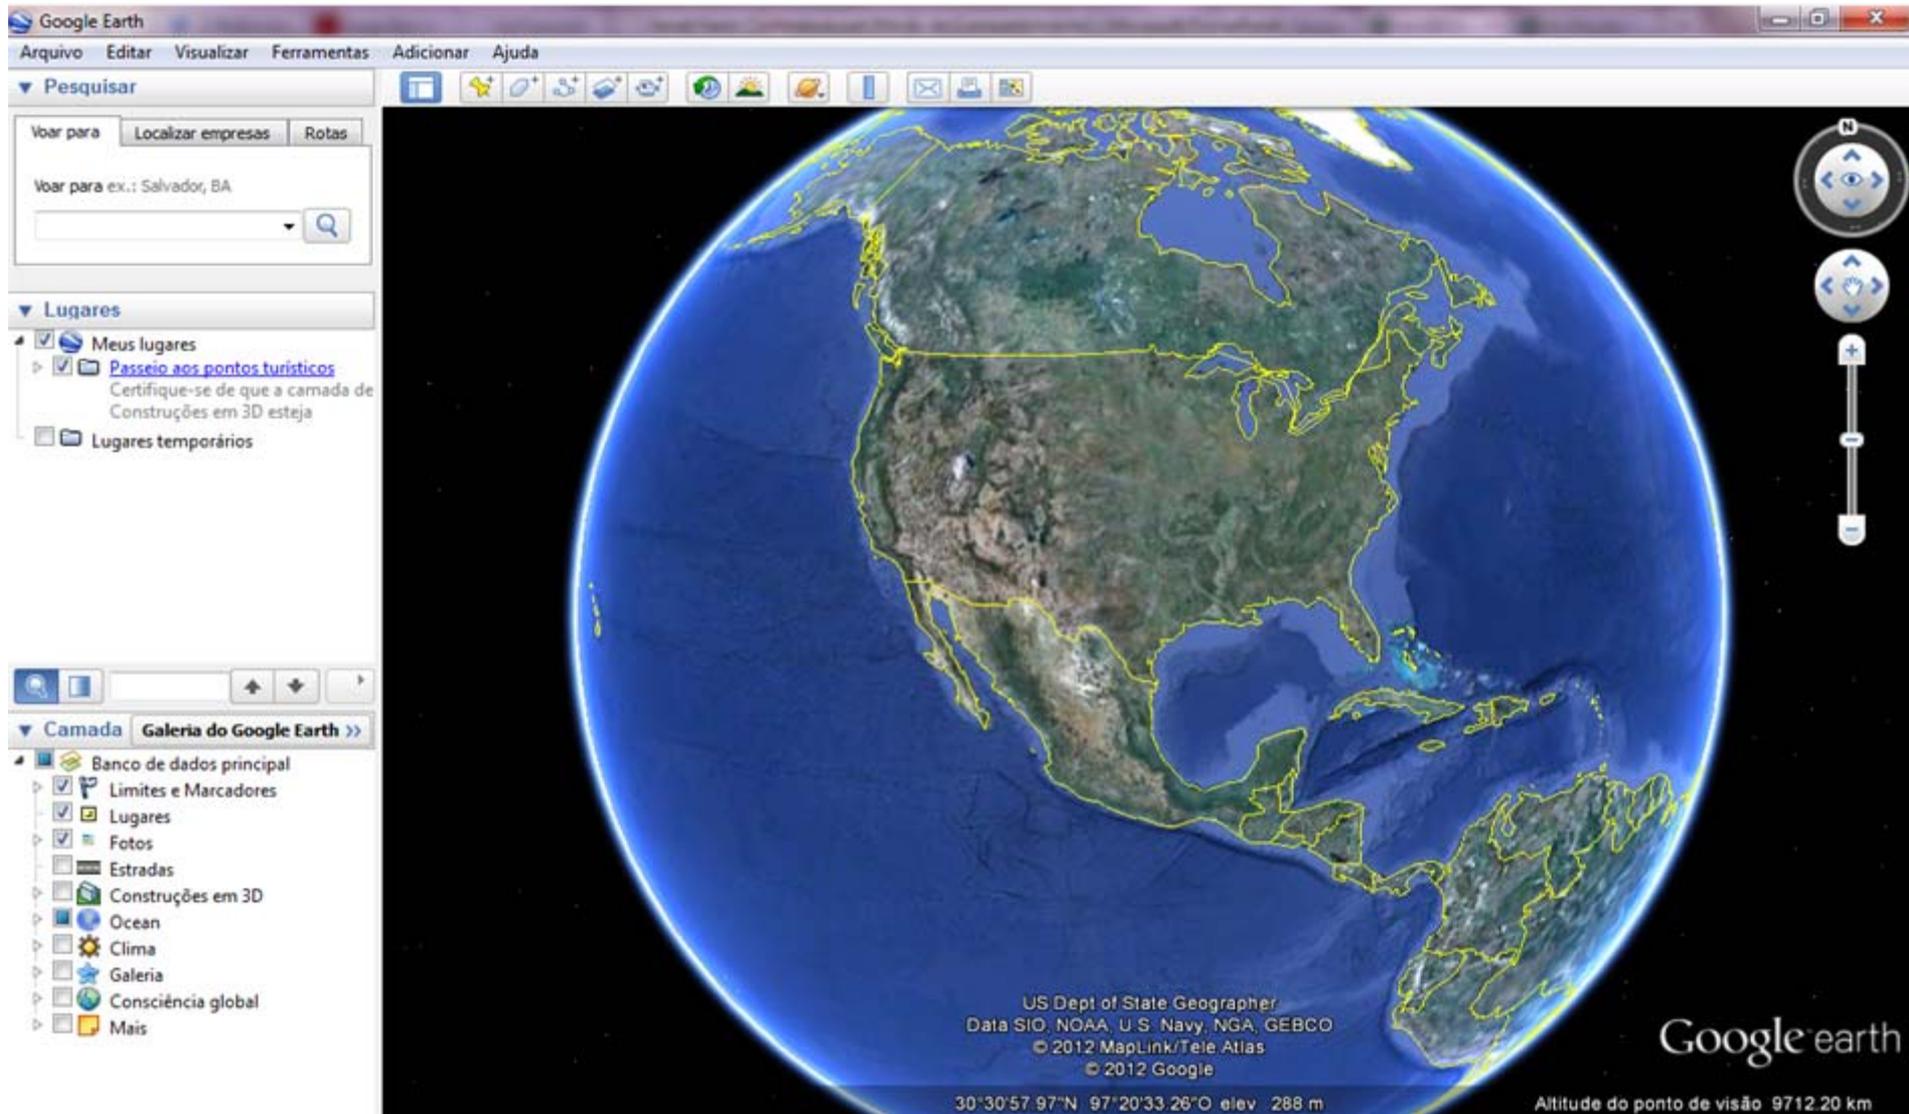

[Download ArcGIS Explorer.](#)

Easily explore, visualize, share, and present your geographic information.

# Free GIS

## Google Earth

# GPS and hardware

- Low-cost: ExpertGPS  
(<http://www.topografix.com>)
- Low-cost hardware: Garmin and Magellan
- Mid-range and high-end hardware: Trimble
- Companies: Trimble, Navigation Electronics, Inc. and Landmark Systems, Inc.
- Apple-based products: Magellan ToughCase GPS adapter, iGPS and iGIS
  - May be used on iPhone or iPod touch

# Approaches to Irrigation Scheduling

Price = around \$3/A, but there is a minimum acreage = ideal scenario is to purchase in a group of neighbors/growers; <http://www.geog2.com/>

# Satellite Imageries

# Free Satellite Imageries

<http://datagateway.nrcs.usda.gov/>

The screenshot shows the homepage of the Geospatial Data Gateway. At the top, the USDA logo is on the left, followed by the text "United States Department of Agriculture" and "Natural Resources Conservation Service". The main title "GEOSPATIAL DATA GATEWAY" is displayed in large white letters on a colorful background. Below the title is a banner with various satellite imagery and a graphic of a hand holding a globe. A navigation menu includes links for Home, Login, Check Order, Status Maps, News, Data Policy, FAQ, Help, Admin, and Contact Us. On the left side, there is a search bar and a "Browse by Subject" menu with categories like Natural Resources, Conservation Service, Farm Services Agency, Rural Development, National Geospatial Management Center (NGMC), Aerial Photography Field Office (APFO), Web Soil Survey, Soil Data Mart, eFOTG, Geo.Data.Gov, and APFO Customer Order Entry System. The main content area features a "Welcome to GDG" message and a large image of a natural rock archway with the text "GEOSPATIAL DATA GATEWAY" overlaid. Below this image is the text "the one stop source for environmental and natural resource data". To the right of the main image is a "GET DATA" button and a graphic with the text "GEOSPATIAL DATA GATEWAY" and "Place a Data Order GDG". At the bottom right, there is a section titled "I Want To..." with a link for "Order by County/Countries".

## Welcome to Web Soil Survey (WSS)

Web Soil Survey (WSS) provides soil data and information produced by the National Cooperative Soil Survey. It is operated by the USDA Natural Resources Conservation Service (NRCS) and provides access to the largest natural resource information system in the world. NRCS has soil maps and data available online for more than 95 percent of the nation's counties and

anticipates having 100 percent in the near future. The site is updated and maintained online as the single authoritative source of soil survey information.

## Four Basic Steps

1

Define.

### Area of Interest (AOI)

Use the **Area of Interest** tab to define your area of interest.

## I Want To...

- [Start Web Soil Survey \(WSS\)](#)
- [Know the requirements for running Web Soil Survey – will Web Soil Survey work in my web browser?](#)
- [Know the Web Soil Survey hours of operation](#)
- [Find what areas of the U.S. have soil data](#)

# Web Soil Survey

- Free
- very easy to use (like Google maps)
- Online (need internet access)
- It's the first step to look at your soils types and distribution in your property
- Resolution is good to have an idea of soil types in the property, but does not tell you P and K levels for soil fertility management, for example
