WALNUT SCALE	5/4				-		

For the Tehama Ashley walnut orchard that we monitor we set the second biofix at 5/26 and are currently at 322 DD.

Double sided sticky tape monitoring in Howard and Chandler near Red Bluff indicates first walnut scale crawlers on 5/4/15. Numbers represent crawlers per day per centimeter of tape. Peak emergence appears to have been 5/26 for the first group of crawlers.

We caught our first Walnut Husk Fly on June 8th, 2015 in the Dairyville area so now would be a good time to get WHF traps out.
