

COMPILED BY: Cindy Fake, Horticulture & Small Farms Advisor, Nevada & Placer Counties

The Internet has a great deal of information about getting started in farming. This information will help you make informed decisions about what to grow, how to grow it, and how to market it. The University of California and other land-grant universities have information on specific crops and production practices. Marketing and economic information is not as extensive, but there are some links listed under small farms.

Cost/Return Studies for Specific Crops

<http://coststudies.ucdavis.edu/> University of California Davis. Includes studies of foothill production of mandarins, grapes, apples, stonefruit, Christmas trees and others.

Fruit and Nut Crop Information
