#### **Natural History of the Central Coast Bioregion**

Whether one drives the Big Sur coastline, or stands at the foot of a giant coast redwood (*Sequoia sempervirens*) or in the shade of an ancient valley oak (*Quercus lobata*), it is clear that the Central Coast Bioregion embodies exceptional biological diversity and natural beauty. Extending from the southwest corner of San Joaquin County south to northern Ventura County, the bioregion is bounded

If it is allowed to live & grow,  
it will reward you.  
It will give you shade  
and shelter from the sun,  
and then back to  
the task just again.  
—John Muir

## **Legacy Publications Converted to PDF**

## [Safflower Production in California](#)

**A note about legacy publication conversions.** When the publications warehouse was downsized and moved to Ontario in January 2018, many publications without a robust sales profile were discontinued in physical form. All of these publications are now under review with the Associate Editors. Those publications that are determined to have up-to-date content, will be scanned as part of this legacy conversion process; the remainder will be sent to the [Hathi Trust Digital Library](#) for archiving.
