PRESS RELEASE FOR IMMEDIATE RELEASE

July 30, 2020

Contact: Colusa County Agricultural Commissioner's Office

Mysterious and Unsolicited Seed Shipments Arriving in Colusa County

The California Department of Agriculture (CDFA) has become aware of a number of reports regarding "mysterious and unsolicited seed shipments from China." These shipments have been arriving at homeowner and business locations throughout the country, including here in Colusa County. The package contents typically list the contents as jewelry, toys, or a number code.

The CDFA is currently in communication with the United States Department of Agriculture (USDA) to determine what the actions will be for these seed packages. In the meantime, CDFA is instructing residents not to open any unsolicited seed packets received. In addition, please **DO NOT PLANT** or dispose of the seeds. Instead, please immediately contact the Colusa County Agricultural Commissioner's Office if you come into possession of these unsolicited seeds, and we will arrange to pick up the seeds or you may drop them off at our office.

Seeds that are legally sold to residents of California must go through proper channels in order to protect California's multi-billion dollar agricultural industry. Colusa County is one of California's significant seed producing locations. Seeds with unknown origin and those that have not been properly inspected, treated, or tested may have a significant impact on our local industry and ag based economy.

If you have received these seeds, please contact our office via the options below to arrange for delivery or pick up. If you have planted any seeds, please contact our office for further direction.
