

Dear all

I am part of a team of a University of California Agriculture and Natural Resources (UCANR) personnel conducting an assessment of needs around Public Safety Power Shutoffs. We have developed this online survey to understand the impacts of last fall's power shutoffs that were carried out by multiple utilities to reduce wildfire hazard during high fire hazard weather events.

You received an email from me last week requesting your participation in this study. I am following up with a request to participate in my study. The survey should take 10-15 minutes to complete. Your participation in this survey is voluntary, however it will be very helpful. It will be helpful to us even if you did not experience a power shutoff.

The results from this survey will be used to inform the development of resources and educational materials related to public safety power shutoffs. Your answers will be kept confidential and the results will be shared in an aggregate form via reports, peer-reviewed publications and conference presentations.

Please take the survey at: https://ucdavis.co1.qualtrics.com/jfe/form/SV_ekRNBZnb5ZVnDGB

If you have already answered, thank you, and please disregard this reminder. Since the survey is anonymous, we do not track who has and hasn't completed it.

For additional information about the project, please contact Susie Kocher sdkocher@ucanr.edu. For information about the project, contact the Principal Investigator, Vikram Koundinya at 530.400.0345 and vkoundinya@ucdavis.edu & the UC Davis Institutional Review Board. hs-irbadmin@ucdavis.edu and 916.703.9151.

Thank you for your participation in this project!

Thank you for your collaboration with this project!

Sincerely,

Your UCANR EDEN team (Extension Disaster Education Network
