

Rabbit Level 1 Test

True or False

Mark the questions on the following screens as True or False.

- 1) A tattoo is placed in the left ear.
 - a) True
 - b) False

- 2) An angora can be raised for wool.
 - a) True
 - b) False

- 3) When lifting a rabbit up you always want to lift them by the ears.
 - a) True
 - b) False

- 4) A male rabbit is called a doe.
 - a) True
 - b) False

- 5) An all wire cage is the easiest to keep clean.
 - a) True
 - b) False

- 6) A pedigree is a list of a rabbit's litter mates.
 - a) True
 - b) False

- 7) Rabbits can get fleas.
 - a) True
 - b) False

- 8) Rabbits can live on lettuce and carrots alone.
 - a) True
 - b) False

- 9) It is ok to foster babies from one litter to another.
 - a) True
 - b) False

- 10) When breeding you always take the buck to the doe's cage.
 - a) True
 - b) False

Rabbit Level 1 Test

11) Keeping your rabbitry clean can help prevent disease.

- a) True
- b) False

12) A, D, E, & K are symbols for vitamins, which support all functions of the body.

- a) True
- b) False

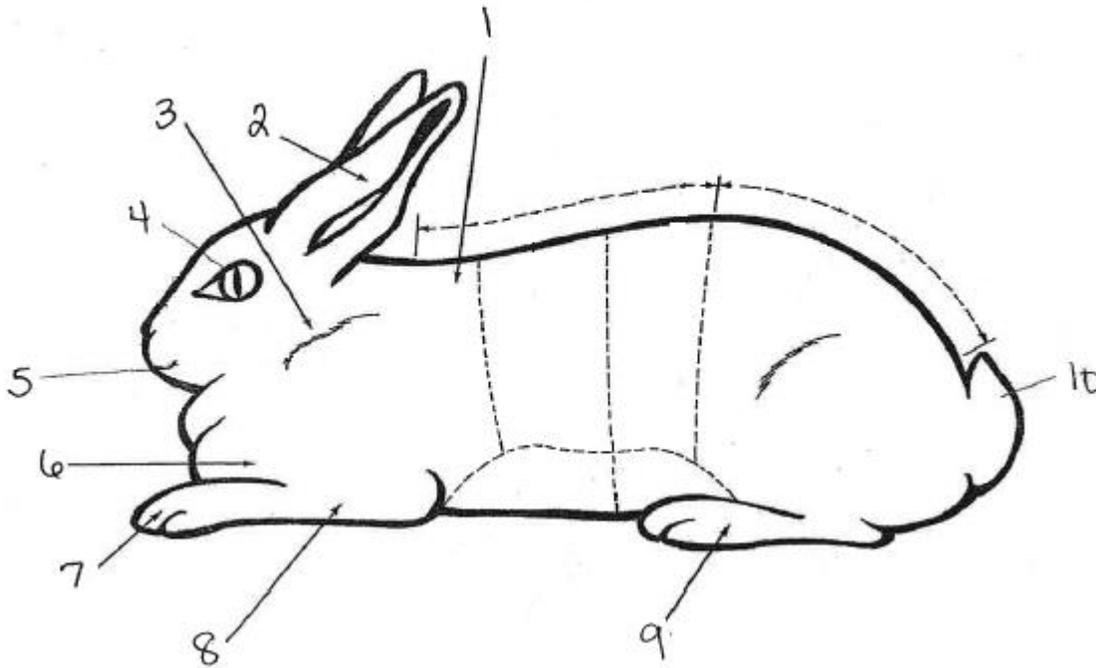

Rabbit Parts

Identify the parts of the rabbit on the next screen.

Use the number to the right of the answer box to locate the part on the diagram.

Select the letter of the correct answer from the list to the right.

RABBIT BODY PARTS

- 13) _____ 1
- 14) _____ 2
- 15) _____ 3
- 16) _____ 4
- 17) _____ 5
- 18) _____ 6
- 19) _____ 7
- 20) _____ 8
- 21) _____ 9
- 22) _____ 10

- a) Neck
- b) Ears
- c) Chest
- d) Tail
- e) Mouth
- f) Saddle
- g) Toes
- h) Leg
- i) Foot
- j) Eye

Rabbit Level 1 Test

Multiple Choice

Read the sentences for each question on the following screens and select the best answer.

- 23) A nest box is needed when a rabbit
- a) calves
 - b) needs a bed
 - c) gives birth (kindles)
 - d) is sick
- 24) The amount of feed a rabbit eats to gain 1 pound of body weight is called?
- a) feed conversion
 - b) weight loss
 - c) fat
 - d) weight gain
- 25) Ear canker is caused by?
- a) ear wax
 - b) a virus
 - c) mites
 - d) loud noises
- 26) Which is the most common ingredient in rabbit food?
- a) calcium
 - b) alfalfa
 - c) corn
 - d) water
- 27) Commercial breeds of rabbits are not ready to breed until they are how old?
- a) 4-5 months
 - b) 5-6 months
 - c) 6-7 months
 - d) 8-9 months
- 28) Throughout a rabbit's lifetime, its teeth continue to what?
- a) break off
 - b) grow
 - c) get stronger
 - d) get soft

Rabbit Level 1 Test

29) How often should water and feed dishes be cleaned?

- a) once a week
- b) once a month
- c) twice a year
- d) once a year

30) What is the gestation period of a rabbit?

- a) 10-14 days
- b) 28-32 days
- c) 35-40 days
- d) 60-70 days

Rabbit Level 2 Test

True or False

Mark the questions on the following screens as True or False.

- 1) A rabbit should be tattooed in the left ear.
 - a) True
 - b) False

- 2) Conformation refers to the shape of the body of the rabbit.
 - a) True
 - b) False

- 3) When showing your rabbit you want it to have a baby coat.
 - a) True
 - b) False

- 4) Snuffles is pneumonia for rabbits.
 - a) True
 - b) False

- 5) A doe may fail to conceive if it is too heavy.
 - a) True
 - b) False

- 6) During showmanship, when you flip the rabbit on its back their hind legs should be pointed away from your stomach.
 - a) True
 - b) False

- 7) Rabbits can handle hot weather better than cold.
 - a) True
 - b) False

- 8) Each breed of rabbit has a body type (profile) that is determined by the parts of the body.
 - a) True
 - b) False

- 9) Ear mites can be treated with water.
 - a) True
 - b) False

- 10) A rabbit's ears can help regulate its body temperature.
 - a) True
 - b) False

Rabbit Level 2 Test

11) A French Lop is a 4-class rabbit.

- a) True
- b) False

12) A Mini Rex is a 4-class rabbit.

- a) True
- b) False

Multiple Choice

Read the sentences for each question on the following screens and select the best answer.

13) In showmanship, what is something you do not check for?

- a) mites
- b) weight
- c) tail carriage
- d) eye color

14) What disease can be described as: Mammary glands become hot, reddened and swollen - later may appear blue in color.

- a) Snuffles
- b) Weepy eye
- c) Myxomatosis
- d) Mastitis

15) How many rabbits make up a meat pen?

- a) 1
- b) 2
- c) 3
- d) 4

16) Rabbit meat has how many calories per pound?

- a) 650
- b) 795
- c) 810
- d) 920

17) What respiratory disease causes a yellow nasal discharge, heavy breathing, and the lungs become infected?

- a) Coccidiosis
- b) Enterotoxemia
- c) Heat Stroke
- d) Snuffles

Rabbit Level 2 Test

18) Which is not a form of malocclusion?

- a) Splayed
- b) Butting
- c) Buck teeth
- d) Wolf Teeth

19) At how many weeks of age should a commercial meat type rabbit weigh 4 pounds and be ready for fryer marketing?

- a) 6
- b) 8
- c) 10
- d) 12

20) What is the average feed conversion of rabbit?

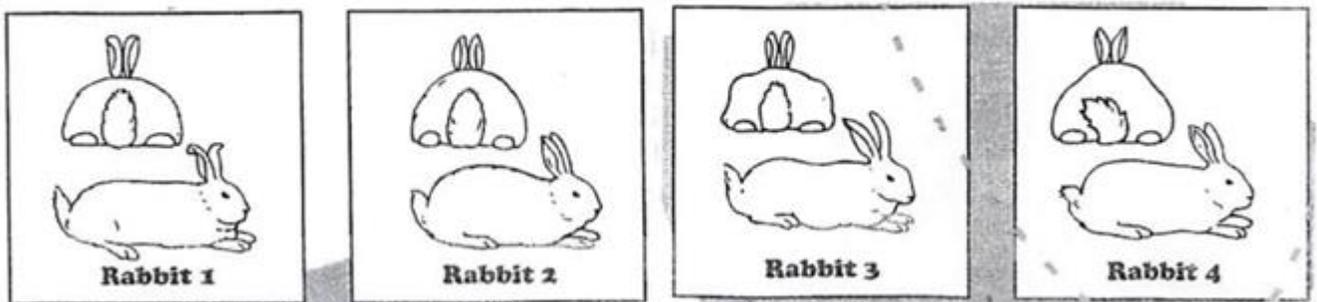

- a) 1-2 pounds of feed for 1 pound of gain
- b) 2-3 pounds of feed for 1 pound of gain
- c) 3-4 pounds of feed for 1 pound of gain
- d) 4-5 pounds of feed for 1 pound of gain

21) Rabbit feed should generally have how much protein in it?

- a) 5 - 7%
- b) 10 - 12%
- c) 14 - 16%
- d) 20 - 22%

22)

When judging this class, and going from highest to lowest, how should these rabbits placed?

- a) 1, 2, 3, 4
- b) 4, 3, 2, 1
- c) 2, 1, 3, 4
- d) 3, 1, 2, 4

Rabbit Level 2 Test

Rabbit Parts

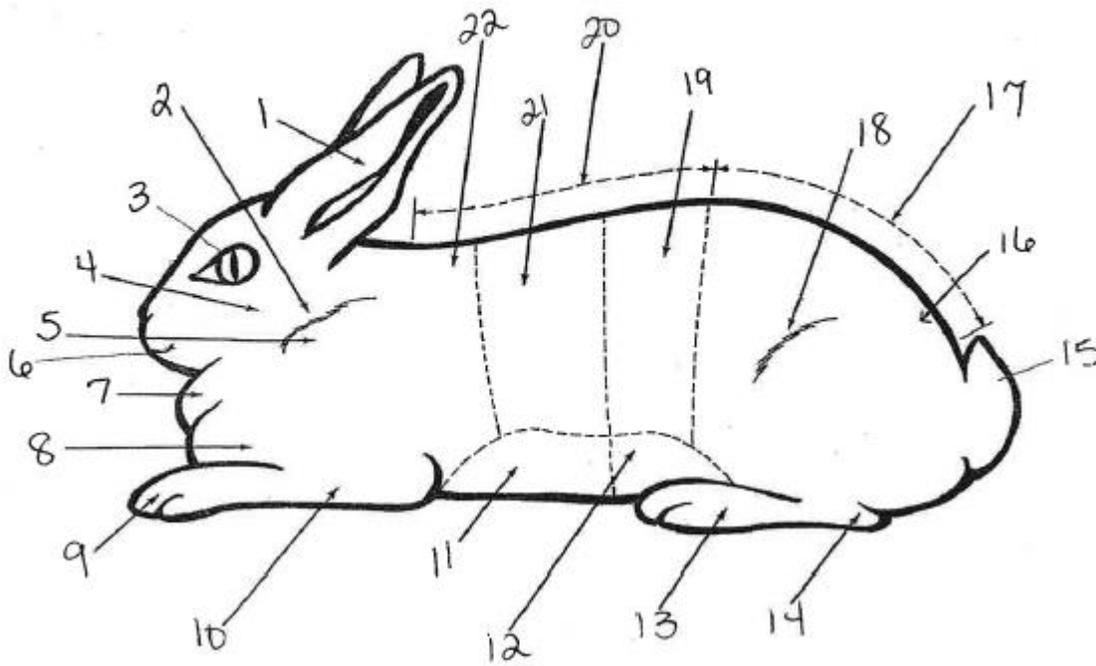

Identify the parts of the rabbit on the next screen.

Use the number to the right of the answer box to locate the part on the diagram.

Select the letter of the correct answer from the list to the right.

Rabbit Level 2 Test

RABBIT BODY PARTS

- 23) _____ 1
- 24) _____ 2
- 25) _____ 3
- 26) _____ 4
- 27) _____ 5
- 28) _____ 6
- 29) _____ 7
- 30) _____ 8
- 31) _____ 9
- 32) _____ 10
- 33) _____ 11
- 34) _____ 12
- 35) _____ 13
- 36) _____ 14
- 37) _____ 15
- 38) _____ 16
- 39) _____ 17
- 40) _____ 18
- 41) _____ 19
- 42) _____ 20
- 43) _____ 21
- 44) _____ 22

- a) Ears
- b) Forequarters
- c) Hock
- d) Chest
- e) Mouth
- f) Dewlap
- g) Hindquarters
- h) Saddle
- i) Toes
- j) Shoulder
- k) Neck
- l) Foot
- m) Flank
- n) Loin
- o) Ribs
- p) Rump
- q) Stomach
- r) Cheek
- s) Tail
- t) Eye
- u) Hip
- v) Leg

Rabbit Level 3 Test

True or False

Mark the questions on the following screens as True or False.

- 1) You can check the bone size of a rabbit by feeling the front leg.
 - a) True
 - b) False

- 2) A benefit to palpating a doe is to see if they have a disease.
 - a) True
 - b) False

- 3) The size of a litter may be determined by heredity.
 - a) True
 - b) False

- 4) Chromosomes are located on tread-like bodies called genes.
 - a) True
 - b) False

- 5) Rabbits and hares are members of the Ochotonidae family.
 - a) True
 - b) False

- 6) Rabbits are born fully furred.
 - a) True
 - b) False

- 7) Hares are born with their eyes open.
 - a) True
 - b) False

- 8) When blowing into the fur, dark skin indicates a prime pelt.
 - a) True
 - b) False

- 9) You must be an ARBA member to register a rabbit.
 - a) True
 - b) False

- 10) All rabbits have flyback fur
 - a) True
 - b) False

Rabbit Level 3 Test

- 11) Wry neck can be caused by a middle and inner ear infection.
- a) True
 - b) False
- 12) Sunlight cannot be used to disinfect equipment.
- a) True
 - b) False
- 13) Ears help regulate a rabbit's body temperature.
- a) True
 - b) False
- 14) It is easiest to palpate a doe at 5-8 days.
- a) True
 - b) False
- 15) In order to register a rabbit, it must be at least 6 months old, meet the minimum weight requirements of a senior animal, and be free of any disqualifications.
- a) True
 - b) False
- 16) Genes that hide the effect of other genes are called dominant.
- a) True
 - b) False

Multiple Choice

Read the sentences for each question on the following screens and select the best answer.

- 17) What is the average number of bunnies a doe should wean for her to remain in a commercial rabbitry?
- a) 5-6
 - b) 7-8
 - c) 9-10
 - d) 11-12
- 18) A rabbit's respiratory rate is _____ beats per minute.
- a) 20-80
 - b) 25-120
 - c) 25-150
 - d) 30-100

Rabbit Level 3 Test

- 19) The practice of rabbits consuming some of the droppings direct from the anus is called _____ ?
- a) Coprophagy
 - b) Genotype
 - c) Pyometr
 - d) Toxoplasmosis
- 20) Agouti refers to:
- a) Eye color
 - b) Fur color pattern
 - c) Body type
 - d) Disease
- 21) Which reproductive part controls the size of a litter?
- a) Ovaries
 - b) Oviducts
 - c) Uterine Horn
 - d) Vulva
- 22) Myxomatosis is what type of disease?
- a) Bacterial
 - b) Hereditary
 - c) Parasitic
 - d) Viral
- 23) Which is a bacterial disease?
- a) Rabbit pox
 - b) Toxemia
 - c) Enteritis
 - d) Toxoplasmosis
- 24) Mating rabbits that are closely related is called:
- a) Linebreeding
 - b) Outcrossing
 - c) Inbreeding
 - d) Linecrossing
- 25) The disease believed to cause the greatest loss of rabbits is:
- a) Coccidiosis
 - b) Conjunctivitis
 - c) Heat Stroke
 - d) Mastitis

Rabbit Level 3 Test

26) According to the Standard of Perfection, what are the 5 accepted eye colors?

- a) Brown
- b) Green
- c) Marbled
- d) Blue
- e) Hazel
- f) Blue-gray
- g) Pink

27) What is a rabbit's average rectal temperature?

- a) 98.5 F
- b) 101 F
- c) 103.1 F
- d) 104.5 F

28) At what age does a kit's eyes open?

- a) 2-3 days
- b) 4-9 days
- c) 10-14 days
- d) 15-18 days

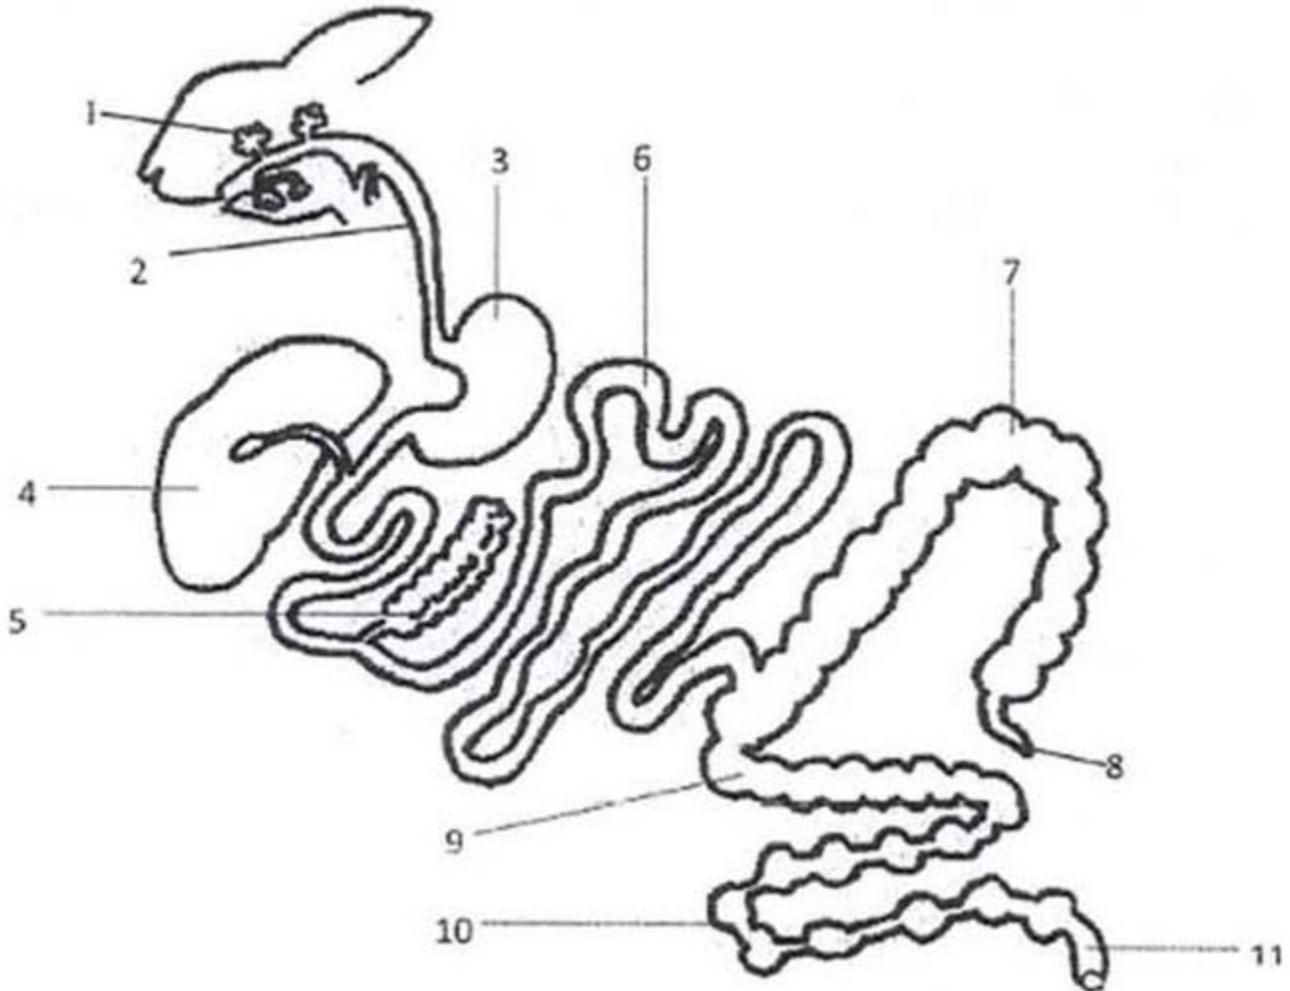

Rabbit Level 3 Test

Digestive System of a Rabbit - Parts

Identify the parts of the rabbit digestive system on the next screen.

Use the number to the right of the answer box to locate the part on the diagram.

Select the letter of the correct answer from the list to the right.

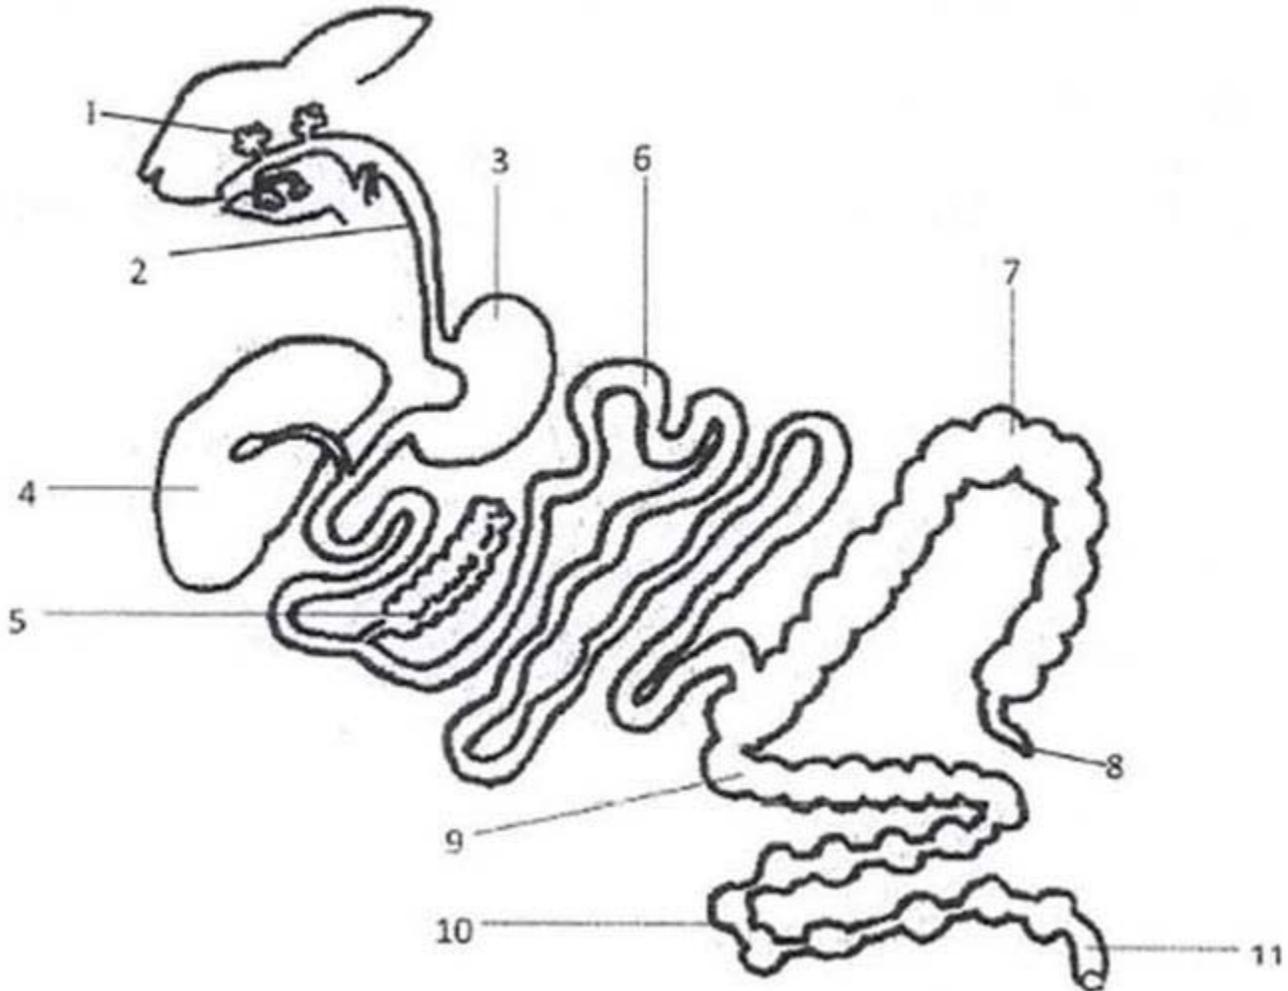

- 29) _____ 1
- 30) _____ 2
- 31) _____ 3
- 32) _____ 4
- 33) _____ 5
- 34) _____ 6
- 35) _____ 7
- 36) _____ 8
- 37) _____ 9
- 38) _____ 10
- 39) _____ 11

- a) Anus
- b) Appendix
- c) Functional Caecum
- d) Large Intestine
- e) Esophagus
- f) Liver
- g) Pancreas
- h) Rectum
- i) Salivary Glands
- j) Small Intestine
- k) Stomach

Rabbit Level 3 Test

Digestive System of a Rabbit - Function

Identify the functions of the parts of the rabbit digestive system on the next screen. Use the number to the right of the answer box to locate the part on the diagram. Select the letter of the correct answer from the list to the right.

- 40) _____ 1
- 41) _____ 2
- 42) _____ 3
- 43) _____ 4
- 44) _____ 5
- 45) _____ 6
- 46) _____ 7
- 47) _____ 8
- 48) _____ 9
- 49) _____ 10
- 50) _____ 11

- a) Absorption of most food nutrients
- b) Absorption of water and minerals
- c) Digestion begins
- d) Emits fecal pellets
- e) Fecal pellets are stored
- f) Holding area for bacterial digestion
- g) Tube for passage from mouth to stomach
- h) Secretes saliva to moisten food
- i) Releases bile
- j) Releases juice to aid in digestion of starch, fats & proteins
- k) Aids in the digestion of cellulose

Rabbit Level 4 Test

True or False

Mark the questions on the following screens as True or False.

- 1) All full arch type breeds must be allowed to move naturally to evaluate type.
 - a) True
 - b) False

- 2) Flaming or burning a cage with a propane torch is a good means to sanitize a cage.
 - a) True
 - b) False

- 3) Orchitis is an infection of the middle ear.
 - a) True
 - b) False

- 4) Rabbits can get salmonella.
 - a) True
 - b) False

- 5) Splay leg is due to a recessive gene factor.
 - a) True
 - b) False

- 6) A heavily marked rabbit in a marked breed or broken group is called a charlie.
 - a) True
 - b) False

- 7) Flyback refers to a coat of fur that quickly returns to its normal position.
 - a) True
 - b) False

- 8) A rabbit with a pigeon breast should be disqualified from a show.
 - a) True
 - b) False

- 9) All breeds allow a junior age rabbit to show as a senior if it exceeds maximum junior weight.
 - a) True
 - b) False

- 10) All heavyweight breeds allow rabbits under 3 months of age to be shown in a pre-junior class.
 - a) True
 - b) False

Rabbit Level 4 Test

- 11) New rabbit breeds being judged under a working standard are allowed to compete for Best of Show.
- a) True
 - b) False
- 12) All bucks must show 2 normally descended testicles in order to be showable.
- a) True
 - b) False
- 13) A rabbit disqualified from its class due to wrong sex (i.e. doe in a buck class) cannot compete in the breed fur class.
- a) True
 - b) False
- 14) A rabbit disqualified for being in the wrong variety changes the official number of animals in the class.
- a) True
 - b) False
- 15) During meat pen judging a Californian or Himalayan marked animal is to be disqualified for smut.
- a) True
 - b) False
- 16) Coccidiosis is caused by a microscopic protozoan parasite that invades the intestine or liver.
- a) True
 - b) False
- 17) Pregnancy toxemia is also called mitosis.
- a) True
 - b) False
- 18) Sheen is found on the Satin fur type.
- a) True
 - b) False
- 19) A blaze is a face marking required on the Dutch breed of rabbit.
- a) True
 - b) False

Multiple Choice

Read the sentences for each question on the following screens and select the best answer.

Rabbit Level 4 Test

20) Which of these breeds does not have a commercial body profile?

- a) French Angora
- b) Thrianta
- c) New Zealand
- d) Cinnamon

21) Which of these is not a bacterial disease?

- a) Snuffles
- b) Pneumonia
- c) Conjunctivitis
- d) Toxemia

22) Which of these is not a viral disease?

- a) Coccidiosis
- b) Myxomatosis
- c) Fibroma
- d) Rabbit Papilloma

23) The practice of rabbits consuming some of the droppings directly from the anus is _____ ?

- a) Genotype
- b) Pyometra
- c) Coprophagy
- d) Toxoplasmosi

24) A mandolin shape is typical of this body profile?

- a) Compact
- b) Commercial
- c) Cylindrical
- d) Semi Arch
- e) Full Arch

25) Except for extreme cases and the addition of new varieties, changes to a breed standard is allowed every _____ years?

- a) 6
- b) 5
- c) 4
- d) 3

26) Which breed may not compete in a commercial fur class?

- a) Champagne D'Argent
- b) Giant Angora
- c) Himalayan
- d) Palamino

Rabbit Level 4 Test

- 27) Which is not generally considered a disqualification from competition:
- a) Thin coat
 - b) A cold
 - c) Pot belly
 - d) Cataract
 - e) Lack of ring definition on an agouti patterned animal
- 28) Which breed does not have flyback?
- a) Belgian Hare
 - b) Californian
 - c) Satin
 - d) Harlequin
- 29) Which of these breeds does not have a compact body profile?
- a) English angora
 - b) Florida White
 - c) Rex
 - d) Silver
- 30) A meat pen is made up of ____ rabbits. No rabbit may be over ____ weeks of age.
- a) 2 rabbits, 10 weeks
 - b) 2 rabbits 15 weeks
 - c) 3 rabbits, 10 weeks
 - d) 3 rabbits, 15 weeks
- 31) For a meat pen of rabbits, the allowable weight range for the rabbits is:
- a) 1.5 - 6 pounds
 - b) 3-6 pounds
 - c) 3.5 - 5.5 pounds
 - d) 5 - 10 pounds
- 32) There are 3 levels of meat rabbit determined by their age and size. The 3 levels are:
- a) Fryer, Roaster, Stewer
 - b) Baker, Roaster, Stewer
 - c) Small, Medium, Large
- 33) What are the three fur characteristics that describe the way fur reacts when stroked from back to front?
- a) Coarse, Medium, Fine
 - b) Flyback, Rollback, Standing
 - c) Flat, Rollback, Medium

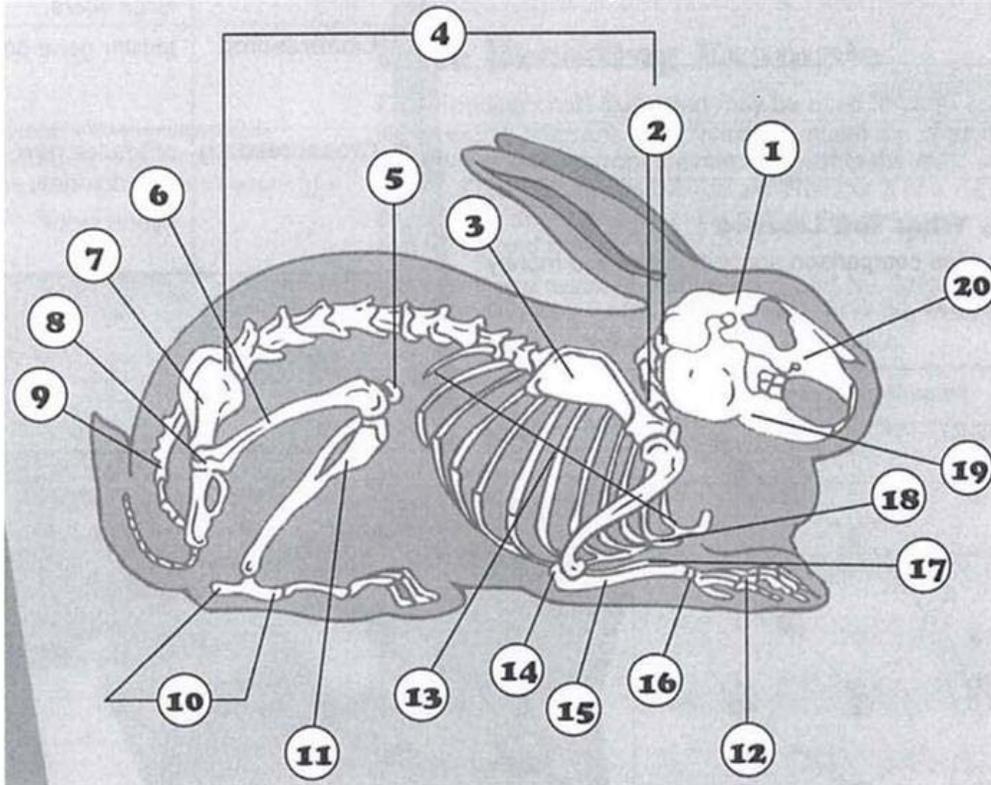

Rabbit Level 4 Test

Rabbit Skeleton

Identify the parts of the rabbit skeleton on the next screen.

Use the number to the right of the answer box to locate the part on the diagram.

Select the letter of the correct answer from the list to the right.

- 34) _____ 1
- 35) _____ 2
- 36) _____ 3
- 37) _____ 4
- 38) _____ 5
- 39) _____ 6
- 40) _____ 7
- 41) _____ 8
- 42) _____ 9
- 43) _____ 10
- 44) _____ 11
- 45) _____ 12
- 46) _____ 13
- 47) _____ 14
- 48) _____ 15
- 49) _____ 16
- 50) _____ 17
- 51) _____ 18
- 52) _____ 19
- 53) _____ 20

- a) Pelvis
- b) Hip Joint
- c) Sternum
- d) Mandible
- e) Ribs
- f) Ulna
- g) Cervical Vertebrae
- h) Caudal Vertebrae
- i) Spine
- j) Elbow
- k) Carpus
- l) Radius
- m) Femur
- n) Maxilla
- o) Patella
- p) Scapula
- q) Tarsus
- r) Phalanges
- s) Tibia
- t) Skull
