

Post-Fire Resilience Workshops

An opportunity for private forest landowners to learn ways to manage their lands after fire

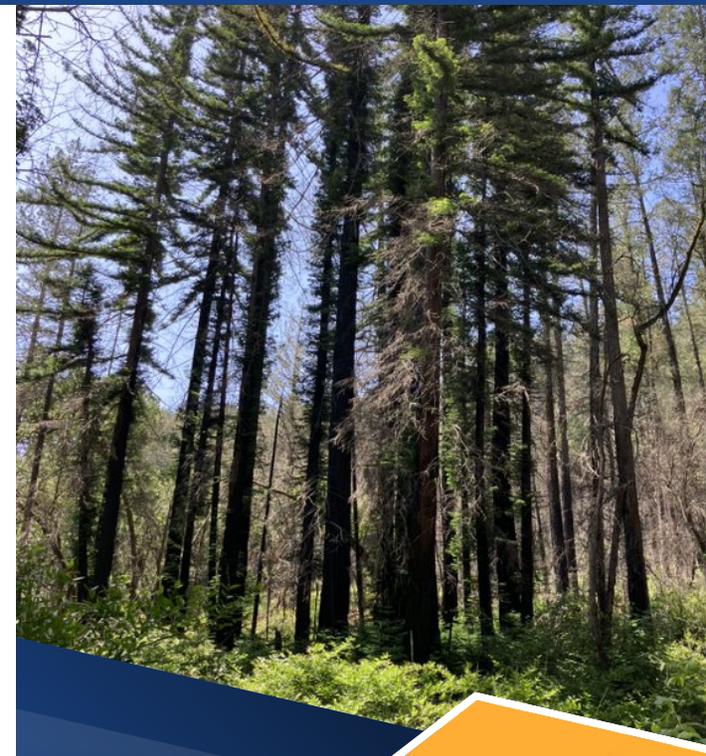

Register today to learn about post-fire land management strategies on private lands and available resources.

Topics in the workshop include:

- Forest health & disturbances.
- Financial & professional assistance
- Reforestation: how and when?
- Safety and erosion control.
- Manage competing and re-sprouting vegetation.
- On-going forest maintenance
- And more!

Information & Registration:

<http://ucanr.edu/post-fire-workshops>

Consider registering if you are a:

- Community member, friend, or neighbor who wants to learn more about managing post-fire lands
- Private forest landowner who owns land (no acreage limit)
- Local agency, tribal member, non-profit, or anyone who wants to learn!

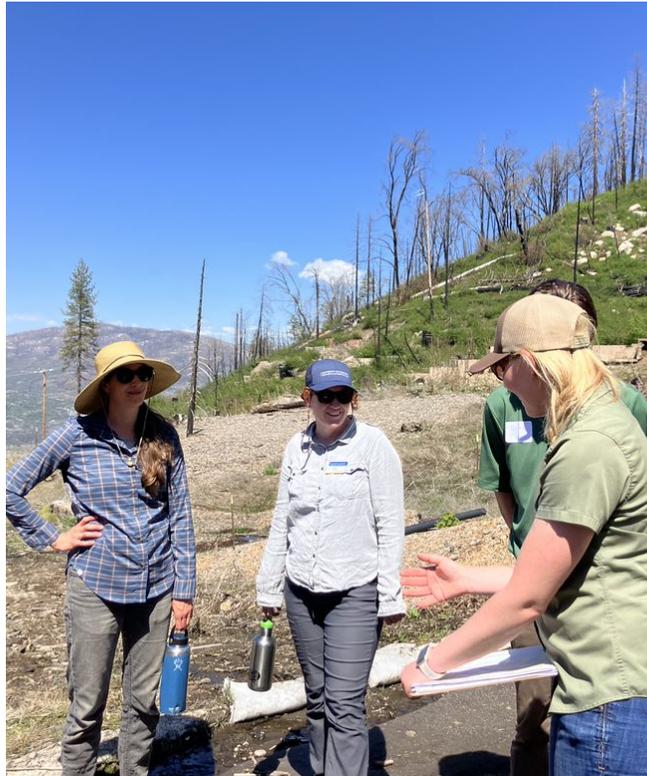

What to expect in the post-fire resilience workshop:

- Meet **once a week, online** (Zoom) in the evenings from 6-7:30pm.
- Meet **in-person for a field trip day**, participants will visit burn sites to discuss management strategies.
- Learn from regional and local resource professionals.
- Collaborate and network with local communities and neighbors.
- Connect and learn about local resources and assistance programs.
