

ORIENTAL FRUIT FLY QUARANTINE

ATTENTION Local Residents

 In the cities of Redlands, Yucaipa, Mentone and surrounding areas.

WHY THE QUARANTINE

 These flies attack more than 230 different types of fruits and vegetables, including avocados, apples, citrus, tomatoes and peppers.

WHAT TO DO WITH PRODUCE

- Residents are urged not to move any fruits or vegetables from their property due to the threat of spread.
- Fruits and vegetables may be consumed or processed (i.e. juiced, frozen, cooked or ground in the garbage disposal) at the property of origin.
- Produce may be disposed by double-bagging it in plastic, sealing it, then placing it in a non-green waste bin.

awm.sbcounty.gov

This invasive fruit fly is a threat to California agriculture. Your efforts will help ensure this pest is eradicated.
