

THIRD THURSDAYS: THINGS FROM THE FIELD

Join us August 8th

North Sac Valley 'Third Thursday Things from the Field'!

Hear **updates** on management strategies for upcoming challenges and share what you've been seeing in the field.

Tour the recently planted walnut variety trial at the Chico State Farm and hear Dr. Pat J. Brown, walnut breeder with the UC Davis Walnut Improvement Program, present on the development of new walnut cultivars.

After **Dr. Brown's presentation**, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum with UCCE farm advisors, growers/orchard managers, consultants and other agricultural professionals.

Lunch is generously sponsored by the California Walnut Board and Commission.

This is an in-person event. No virtual option is available.

AT A GLANCE
